**Hamburg Cruise Days**

This city is cosmopolitan and maritime. In Hamburg, water is everywhere you go, and the constant coming and going of traffic give it an air of normalcy. Seagulls wheel about the floating docks of Landungsbrücken, the world’s largest urban development, where you can see and be seen. For a relaxed stroll, or a fun night on the town, walk along the Ostrade, past the Miniatur Wunderland, to the floating docks of Landungsbrücken for a view of the harbour. You can tell you’re close to the “Gateway to the World” when you smell the unmistakable air of freedom, adventure and the sea. The “Gateway to the World” has an impetus of progress, of which naturally nowhere more so than at the docks. An architectural gem and picturesque idyll in direct proximity to the bustle of the port.

**Historically beautiful**

In Hamburg, the past meets the present – with and without a time machine. From medieval remains to modern grandeur, Hamburg is a living museum, the largest and most complete of its kind in Europe.

Thalia Theater success – fully focuses on contemporary director’s theater... absolutely irresistible. Everywhere you go there is something of a questionable moral nature to see (and maybe do).
